Configuração de micro mínima para rodar o Esprit 2009.

ESPRIT 2009: System and Component Requirements

ID: 2456
Date: 21-May-2008
Group: ESPRIT 2009

Summary System and component requirements for running ESPRIT 2009

ESPRIT 2009 System and Component Requirements

Welcome to ESPRIT 2009, the latest release of DP Technology's CAD\CAM solution ESPRIT. Computer systems that meet the minimum supported hardware requirements will be able to run ESPRIT 2009. Any hardware requirement that exceeds the minimum will improve the performance and user experience of ESPRIT 2009.

ESPRIT 2009 Minimum Hardware Requirements	
Processor	800 MHz 32-bit (x86)
System Memory	512 MB
GPU	SVGA (1024x768)
Graphics Memory	32 MB
HDD	20 GB
HDD Free Space	1 GB
Optical Drive	DVD-ROM
Ports	Parallel or USB (required for ESPRIT security)

ESPRIT requires certain operating system components to be installed to function properly. These are prerequisites of installing ESPRIT. These components must be installed prior to installing ESPRIT. Systems failing to meet these criteria will cause the ESPRIT installation to fail.

Required Operating System Components for ESPRIT 2009
Microsoft® Windows® XP SP2 x32 or x64 ^[1] or Windows® Vista™ x32 or x64 ¹
Microsoft® Internet Explorer® version 6.0 or greater
Microsoft® .NET Framework version 2.0.50727
Microsoft® SQL Server 2005 Express edition
SafeNet Sentinel drivers version 5.39 or greater
